MXMA 5200 US SX

The MXMA 5200 front fork is an absolute high-end, full adjustable race unit to cope with the extreme demands of SX and MX racing.

Features

- Adjustable compression damping
- Adjustable rebound damping
- Adjustable spring pre-load
- All adjustments adjustable from the outside
- High impact resistant materials and coatings
- Different spring rates available

PDS 5018 US SX

The PDS 5018 SX Shock absorber is a real state-of-the-art product, build from the lightest materials with a superb finish in combination with a highly advanced damping system.

Features

- Separate adjustable high- and lowspeed compression damping
- Adjustable rebound damping
- Adjustable spring pre-load
- 50mm piston and 18mm spindle for large amount of oil movement, providing better control
- Large nitrogen reservoir for constant damping under high temperatures
- Different spring rates available
